

Architecture

SENIOR PROJECT MANAGER

Responsibilities

- Manage all aspects of Architectural Projects.
- Attend and document Client Development meetings. Acquire general information required to establish type, "expectations", and scope of work/criteria for the intended project.
- Research, programming and preliminary Schematic Design to set the direction for the Project. Develop an Architectural program defining the scope of the Project and determine major interior functions within the schematic footprint of the physical building in relationship with the available site and its existing characteristics, utilities, etc.
- Establish requirements and schedule of the public agency review process, and procure all documentation available.
- Format and produce Schematic Design and Design Development presentation drawings to meet Owner requirements for financing, approval and as required for public agency review.
- Submit appropriate application and architectural presentation drawings to Planning/Zoning Dept. as required.
- Work with the Project Manager and Project Superintendent throughout the development and coordination of specifications and working drawings to keep communications current relative to Project budget, schedule and contracting.
- Prepare Architectural Punch list upon substantial completion and/or opening of Project for review and implementation by Project Manager and construction superintendent.

Job Requirements

- Ten (10) or more years verifiable work experience in Commercial Architecture.
- Ability to communicate effectively and professionally with Company employees and clients.
- Ability to maintain the highest level of confidentiality, handling sensitive information concerning both the Company and Clients.
- Adept at multi-tasking, with exceptional organizational skills.
- Proficient in MS Office products such as Word, Excel, Project and Outlook and be proficient in CADD.
- Capable of creating a team atmosphere leading to successful completion of projects.
- Assist direct reporting staff by offering input and solutions to project issues, ensuring consistency and quality on all projects
- Strong technical Architectural background and knowledge in reviewing of drawings.
